## **ATTENZIONE!**

Al fine di ridurre i rischi di incidenti o infortuni, è essenziale seguire attentamente le seguenti precauzioni:

- 1 - Installare **ESCLUSIVAMENTE** le pastiglie freno fornite nella confezione su veicoli inclusi nell'elenco delle applicazioni approvate (verificare l'elenco).
- 2 - Il montaggio deve avvenire seguendo scrupolosamente le istruzioni del produttore e affidandolo solo a personale qualificato.
- 3 - La sostituzione delle pastiglie deve avvenire quando lo spessore del materiale d'attrito raggiunge un minimo di 2 mm. La responsabilità del produttore è strettamente legata alle condizioni di utilizzo delle pastiglie.
- 4 - L'utilizzo di pastiglie sinterizzate è consentito solo per pinze originariamente equipaggiate con pastiglie sinterizzate dalla casa produttrice.
- 5 - Tutte le pastiglie montate su una singola ruota devono essere sostituite simultaneamente.
- 6 - Le nuove pastiglie devono essere costantemente mantenute pulite, senza tracce di sporco, olio o altre sostanze contaminanti. Le piste frenanti dei dischi non devono essere lubrificate con grasso o altri lubrificanti.
- 7 - Durante la pulizia della sede delle pastiglie, si consiglia di evitare l'uso di prodotti dannosi per le guarnizioni in gomma, come percloro-azoto, benzina o tricloroetilene.
- 8 - Non scollegare mai il tubo del fluido d'ingresso del liquido freno.
- 9 - Se presenti, rimuovere perni e molle che bloccano la pastiglia.
- 10 - Smontare la pinza freno e spingere completamente i pistoni all'interno delle sedi utilizzando le vecchie pastiglie come leva aiutandosi con un morsetto o cacciavite.
- 11 - Montare le pastiglie facendo attenzione a inserirle con il materiale d'attrito rivolto verso il disco e rimontare la pinza sul supporto.
- 12 - Assicurarsi di riattivare la pinza del freno portando le pastiglie a contatto con il disco attraverso la pompa freno.
- 13 - Evitare frenate brusche per i primi 160 km (100 miglia) permettendo così la miglior adattabilità delle nuove pastiglie al disco freno.

## **WARNING!**

In order to reduce the risks of accidents or injuries, it is essential to carefully pay attention to the following precautions:

- 1 - Install **EXCLUSIVELY** the brake pads provided in the package on vehicles included in the approved applications list (please check the list).
- 2 - The installation must be carried out meticulously following the manufacturer's instructions and entrusted only to qualified personnel.
- 3 - Replace the brake pads when the thickness of the friction material reaches a minimum of 2 mm. The manufacturer's responsibility is strictly linked to the conditions of use of the pads.
- 4 - The use of sintered pads is allowed only for calipers originally equipped with sintered pads by the manufacturer.
- 5 - All pads mounted on a single wheel must be replaced simultaneously.
- 6 - Keep the new brake pads constantly clean, without traces of dirt, oil, or other contaminating substances. The braking surfaces of the discs must not be lubricated with grease or other lubricants.
- 7 - During the cleaning of the brake pad seating, it is advisable to avoid using products harmful to rubber gaskets, such as perchloroethylene, gasoline, or trichloroethylene.
- 8 - Never disconnect the fluid inlet tube of the brake fluid.
- 9 - If present, remove pins and springs that secure the pad.
- 10 - Disassemble the brake caliper and push the pistons completely into the seats using the old pads as a lever, using a clamp or screwdriver.
- 11 - Install the pads, ensuring to insert them with the friction material facing towards the disc, and remount the caliper on the support.
- 12 - Make sure to reactivate the brake caliper by bringing the pads into contact with the disc through the brake pump.
- 13 - Avoid abrupt braking for the first 160 km (100 miles) to allow a better adaptation of the new pads to the brake disc.

## **ATTENTION!**

Afin de minimiser les risques d'accidents ou de blessures, veuillez observer scrupuleusement les précautions suivantes :

- 1 - Installer **EXCLUSIVEMENT** les plaquettes de frein fournies dans l'emballage sur les véhicules inclus dans la liste des applications approuvées (vérifier la liste).
- 2 - Le montage doit être effectué méticuleusement en suivant les instructions du fabricant et en le confiant uniquement à du personnel qualifié.
- 3 - Remplacer les plaquettes de frein lorsque l'épaisseur du matériau de friction atteint un minimum de 2 mm. La responsabilité du fabricant est strictement liée aux conditions d'utilisation des plaquettes.
- 4 - L'utilisation de plaquettes frittées est autorisée uniquement pour les étriers équipés d'origine de plaquettes frittées par le fabricant.
- 5 - Toutes les plaquettes montées sur une même roue doivent être remplacées simultanément.
- 6 - Maintenir constamment propres les nouvelles plaquettes, sans traces de saleté, d'huile ou d'autres substances contaminantes. Les surfaces de freinage des disques ne doivent pas être lubrifiées avec de la graisse ou d'autres lubrifiants.
- 7 - Lors du nettoyage du logement des plaquettes, il est recommandé d'éviter l'utilisation de produits nocifs pour les joints en caoutchouc, tels que le perchloroéthylène, l'essence ou le trichloréthylène.
- 8 - Ne jamais débrancher le tube d'entrée de fluide du liquide de frein.
- 9 - Si présents, retirer les broches et les ressorts maintenant la plaquette en place.
- 10 - Démonter l'étrier de frein et repousser complètement les pistons à l'intérieur des logements en utilisant les anciennes plaquettes comme levier, à l'aide d'une pince ou d'un tournevis.
- 11 - Installer les plaquettes en veillant à les insérer avec le matériau de friction face au disque, et remonter l'étrier sur le support.
- 12 - S'assurer de réactiver l'étrier de frein en mettant les plaquettes en contact avec le disque via la pompe de frein.
- 13 - Éviter les freinages brusques pendant les premiers 160 km (100 miles) pour permettre une meilleure adaptation des nouvelles plaquettes au disque de frein.

## **ADVERTENCIA!**

Con el fin de reducir los riesgos de accidentes o lesiones, es esencial seguir cuidadosamente las siguientes precauciones:

- 1 - Instalar **EXCLUSIVAMENTE** las pastillas de freno proporcionadas en el paquete en vehículos incluidos en la lista de aplicaciones aprobadas (verificar la lista).
- 2 - La instalación debe llevarse a cabo meticulosamente siguiendo las instrucciones del fabricante y confiándola únicamente a profesionales.
- 3 - Reemplazar las pastillas de freno cuando el grosor del material de fricción alcance un mínimo de 2 mm.  
La responsabilidad del fabricante está estrictamente vinculada a las condiciones de uso de las pastillas.
- 4 - El uso de pastillas sinterizadas está permitido solo para pinzas equipadas originalmente con pastillas sinterizadas por el fabricante.
- 5 - Todas las pastillas montadas en una sola rueda deben ser reemplazadas simultáneamente.
- 6 - Mantener constantemente limpias las nuevas pastillas, sin rastros de suciedad, aceite u otras sustancias contaminantes. Las superficies de frenado de los discos no deben lubricarse con grasa u otros lubricantes.
- 7 - Durante la limpieza del asiento de las pastillas, se recomienda evitar el uso de productos perjudiciales para las juntas de goma, como percloroetileno, gasolina o tricloroetileno.
- 8 - Nunca desconectar el tubo de entrada de fluido del líquido de frenos.
- 9 - En caso de presencia, retirar pernos y muelles que sujetan la pastilla.
- 10 - Desmontar la pinza de freno y empujar completamente los pistones hacia adentro utilizando las viejas pastillas como palanca, con la ayuda de una abrazadera o destornillador.
- 11 - Instalar las pastillas, asegurándose de insertarlas con el material de fricción orientado hacia el disco, y volver a montar la pinza en el soporte.
- 12 - Asegurarse de reactivar la pinza de freno llevando las pastillas al contacto con el disco a través de la bomba de freno.
- 13 - Evitar frenadas bruscas durante los primeros 160 km (100 millas) para permitir una mejor adaptación de las nuevas pastillas al disco de freno.

## **ACHTUNG!**

Um das Risiko von Unfällen oder Verletzungen zu minimieren, beachten Sie bitte die folgenden Vorsichtsmaßnahmen:

1. Installieren Sie **AUSSCHLIESSLICH** die im Paket enthaltenen Bremsbeläge an Fahrzeugen, die in der Liste der zugelassenen Anwendungen aufgeführt sind (überprüfen Sie die Liste).
2. Die Montage muss sorgfältig gemäß den Anweisungen des Herstellers erfolgen und sollte ausschließlich qualifiziertem Personal übertragen werden.
3. Ersetzen Sie die Bremsbeläge, wenn die Dicke des Reibungsmaterials auf ein Minimum von 2 mm abgenutzt ist. Die Verantwortung des Herstellers ist eng mit den Nutzungsbedingungen der Bremsbeläge verknüpft.
4. Die Verwendung von gesinterten Bremsbelägen ist nur für Bremssättel gestattet, die ursprünglich vom Hersteller mit gesinterten Bremsbelägen ausgestattet waren.
5. Alle an einem einzelnen Rad montierten Beläge müssen gleichzeitig ausgetauscht werden.
6. Halten Sie die neuen Beläge ständig sauber und frei von Verschmutzungen, Öl oder anderen kontaminierenden Substanzen. Die Bremsflächen der Scheiben dürfen nicht mit Fett oder anderen Schmierstoffen geschmiert werden.
7. Bei der Reinigung der Belagfläche ist es ratsam, die Verwendung von Produkten zu vermeiden, die potenziell schädlich für Gummidichtungen sind, wie Perchlorethylen, Benzin oder Trichlorethylen.
8. Trennen Sie niemals den Einlassschlauch für Bremsflüssigkeit ab.
9. Entfernen Sie, falls vorhanden, Bolzen und Federn, die den Belag sichern.
10. Bauen Sie den Bremssattel ab und drücken Sie die Kolben mit den alten Belägen als Hebel vollständig zurück, indem Sie eine Klemme oder einen Schraubendreher verwenden.
11. Installieren Sie die Beläge und achten Sie darauf, sie mit dem Reibungsmaterial zum Bremsscheibe hin einzusetzen, und montieren Sie den Bremssattel wieder am Träger.
12. Stellen Sie sicher, dass der Bremssattel durch Betätigen des Bremshebels aktiviert wird und die Beläge in Kontakt mit der Bremsscheibe kommen.
13. Vermeiden Sie in den ersten 160 km (100 Meilen) abruptes Bremsen, um eine bessere Anpassung der neuen Beläge an die Bremsscheibe zu ermöglichen.
